

I am vehemently opposed to the vote that will occur on June 2 to allow for rule changes that would undermine American journalism and allow for a few media companies to dominate the market.

It is vital that we maintain the current rules and support a free and independent press. Media plays a critical role in democratic societies by providing information and alternative points of view that would be severely curtailed by the upcoming vote. The FCC should protect the rights of consumers in American society who are better served by multiple sources of media.

I urge the FCC to preserve the tenets of a democratic society by allowing independent stations to exist. Please vote to maintain the current rules. Thank you.
